REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a moving image coding method and apparatus for coding a moving image. The closest prior art, Daoudi et al. (USPN 5,870,500), shows a similar system, in which, a method of processing data in matrix arrays in a motion estimation system is characterized in that each array performing a calculation of distortion for a block of pixels of a current image, at least two arrays being arranged in series performing the calculations for at least two adjacent blocks of the said current image, the reference window corresponding to the entirety of these blocks being introduced in bands of pixels into the first of the said arrays and propagating from array to array in the said series of arrays, the allocation of the blocks to the arrays and the direction of introduction of the band into the arrays being such that the last part of the band introduced into the array

corresponds to a part of the window of the block allocated to the first of the arrays. However, Daoudi et al. fail to address: "for wherein determining position of a macro block which is intra-coded or inter-coded, in a range of the maximum number of macro blocks inter-coded in one image frame, when an image (Mth frame, $M < N-1$) prior to a present image (Nth frame) is coded". This distinct feature has been added to each independent claim and renders them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
